

Mastering LinkedApply Pro

A comprehensive, step-by-step handbook covering AI configuration, ATS resume building, job-tailoring, safe auto-applying on LinkedIn, and application tracking.

 5-Minute Read  100% Client-Side Privacy  Zero Subscriptions (BYOK)

SECTION 01

Quick Start & Installation

LinkedApply Pro is built on Manifest V3. All code, settings, resumes, and API requests execute directly on your local device—no remote servers or middleman databases are involved.

1 Load the Extension in Google Chrome

Open `chrome://extensions` in your Chrome browser. Enable **Developer mode** in the top-right corner, click **Load unpacked**, and select the `extension/dist` folder (or install directly from the Chrome Web Store).

2 Pin LinkedApply Pro to your Toolbar

Click Chrome's puzzle piece icon  in the top toolbar, find **LinkedApply Pro**, and click the pin icon . This gives you instant 1-click access to the popup controls on any tab.

3

Explore the 4 Core Environments

LinkedApply Pro provides four integrated workspaces:

Extension Popup

Quick start/stop button, live application counter, and 1-click navigation from any LinkedIn page.

Sidepanel Dashboard

Runs alongside LinkedIn: Overview stats, daily goal progress, and Kanban job pipeline.

Visual Resume Builder

Full-page studio with 11 professional templates, color picker, and AI job-tailoring drawer.

Options & Settings

Profile form, pre-filled question answers, bot pacing speed, and AI API keys.

1-CLICK EASY APPLY AUTOMATION

Automate LinkedIn Applications in 1 Click

Auto-apply to matching jobs • Smart question answering • Safe human-like delays

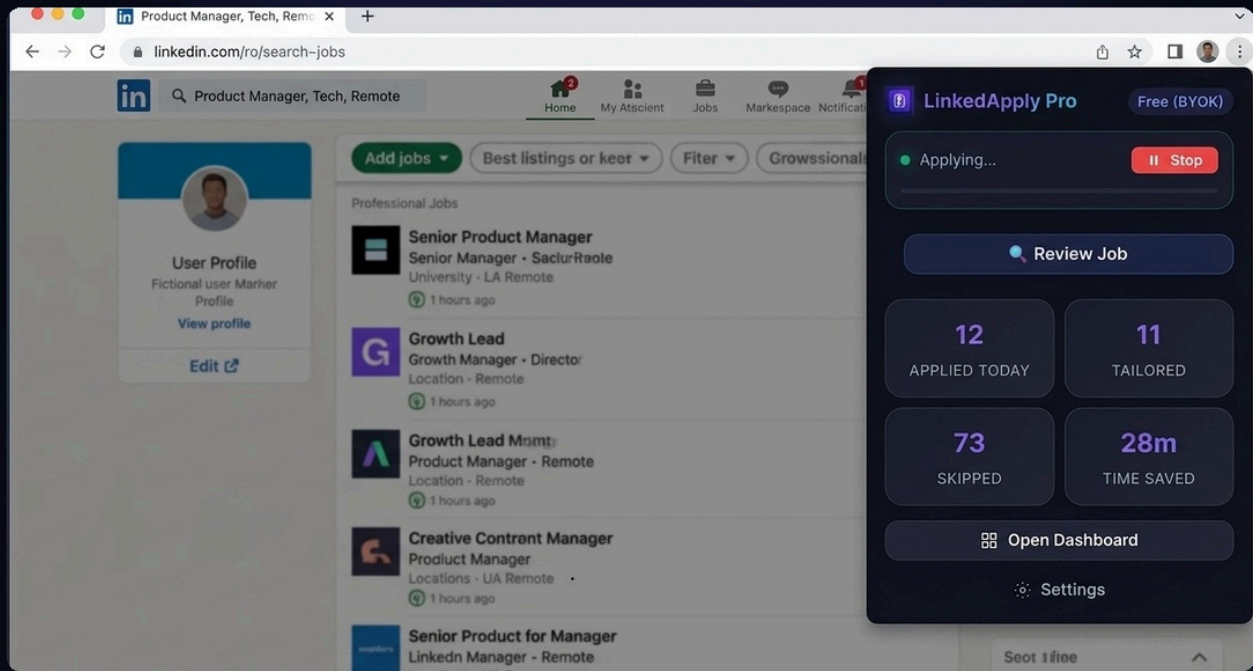

Fig 1.1: Extension popup running live on a LinkedIn job search page

SECTION 02

Bring Your Own AI (BYOK) Configuration

LinkedApply Pro uses a **Bring Your Own Key (BYOK)** model. Instead of paying a \$30-\$50/month subscription, you connect your own API key directly. All AI features—including question answering, keyword gap analysis, and bullet point rewriting—are completely free or cost fractions of a cent per job.

💡 Recommended: Google Gemini (100% Free)

Google offers a generous free tier for Google Gemini Flash with thousands of free API calls per day. This is more than enough for hundreds of daily applications without spending a dime.

Step-by-Step Gemini Setup (Takes 60 Seconds)

1 Get your Free Gemini API Key

Visit Google AI Studio and sign in with your Google account. Click **Create API Key**.

`https://aistudio.google.com/app/apikey`

Copy URL

2 Paste in LinkedApply Settings

Open LinkedApply Pro Settings, navigate to the **AI Settings** tab on the left sidebar. Set Provider to **Google Gemini**, leave Model as `gemini-2.5-flash`, and paste your API key.

3 Test Connection & Save

Click **Test Connection**. You should see a green checkmark indicating `Connected!`. Then click **Save AI Settings**.

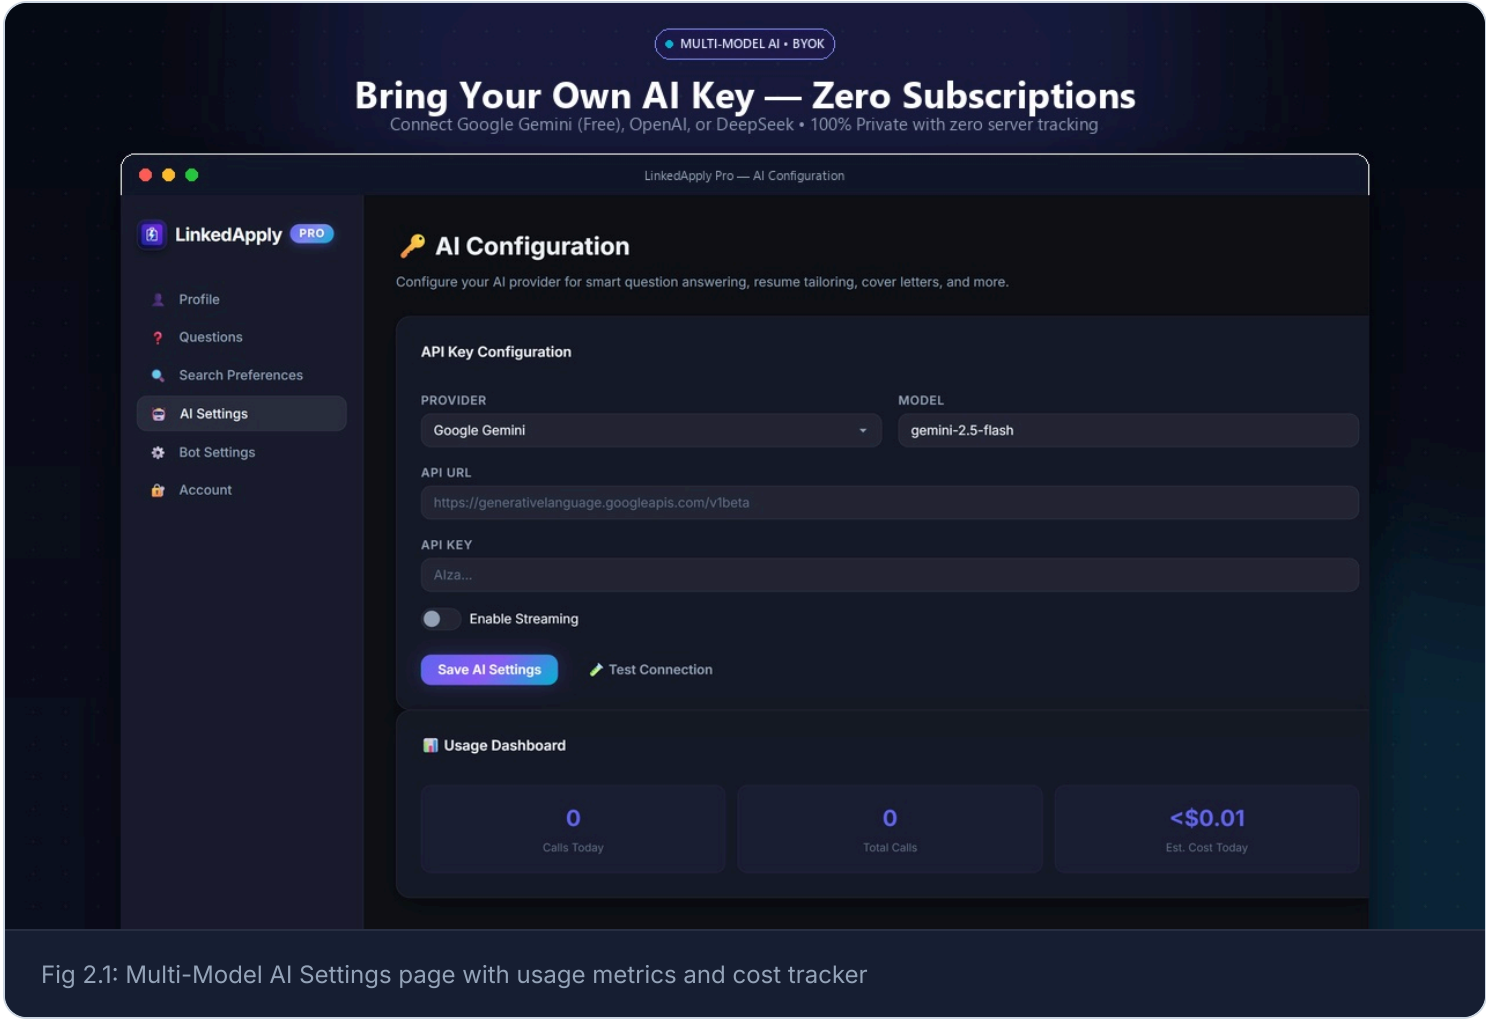

Fig 2.1: Multi-Model AI Settings page with usage metrics and cost tracker

Alternative Supported Providers

Provider	Recommended Model	Cost per 100 Jobs	Best For
Google Gemini	gemini-2.5-flash	\$0.00 (Free Tier)	Best overall — fast, high intelligence, completely free
OpenAI	gpt-4o-mini	~\$0.04	Ultra-reliable structured output formatting
DeepSeek	deepseek-chat	~\$0.02	Budget-conscious users wanting strong reasoning
Custom Endpoint	OpenAI-compatible	Varies	Local LLMs (Ollama / LMStudio / vLLM) for total offline usage

Profile Setup & Pre-Filled Question Answers

LinkedIn Easy Apply forms frequently ask repetitive screening questions (e.g. years of experience, sponsorship, salary, notice period). Configuring your profile ensures these are answered accurately and instantly.

Software Engineer | Full Stack | Open to Work

DEFAULT COVER LETTER

Dear Hiring Manager...

Skills & Experience

Fig 3.1: Default Question Answers configuration

Key Screening Form Fields

Field	Example Value	How the Bot Uses It
Years of Experience	3 , 5 , 8	Fills numeric experience inputs for your primary profession.
Visa Sponsorship	No / Yes	Answers "Will you now or in the future require sponsorship?"
US Citizenship / Eligibility	Yes / No	Handles legal authorization and right-to-work screening dropdowns.
Notice Period (Days)	0 (Immediate), 15 , 30	Answers availability and start date questions.
Expected Salary	120000 or local currency LPA	Fills compensation expectations without manual typing.
Default Cover Letter	Markdown or plain text	Automatically uploaded or pasted when a cover letter is requested.

Smart AI Fallback for Unknown Questions

When an application form asks a non-standard question not found in your default answers (e.g. *"Have you worked with Kubernetes in an enterprise cluster?"*), LinkedApply Pro automatically consults your AI provider and uploaded resume to draft a factual, tailored answer in seconds.

SECTION 04

Visual Resume Builder

LinkedApply Pro includes a full-fledged, standalone Visual Resume Builder designed for maximum ATS (Applicant Tracking System) parseability. It generates single and multi-page professional resumes directly in your browser.

Build Recruiter-Approved Resumes

11 professional templates • Real-time live editor • 1-click PDF download & Easy Apply sync

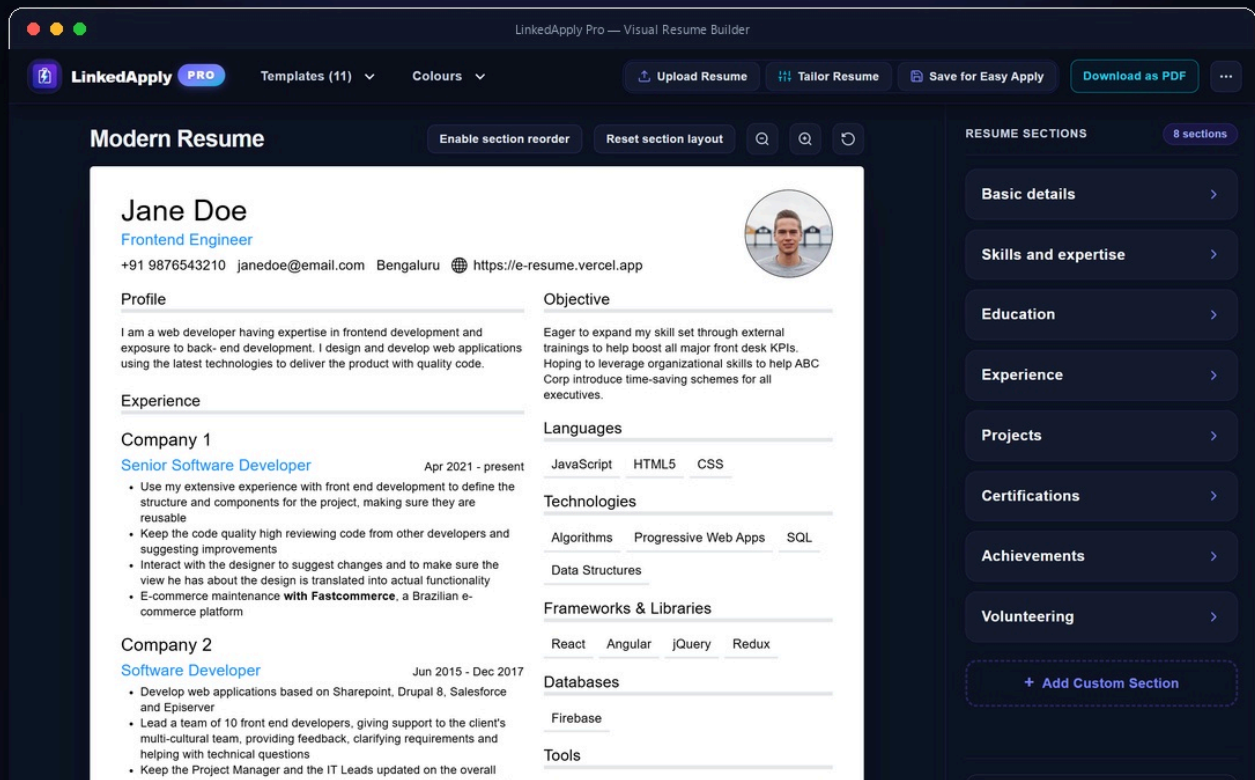

Fig 4.1: The interactive Visual Resume Builder editing the Modern Resume template

Key Features of the Builder

1 11 Professional ATS Templates

Choose from 11 recruiter-tested designs: Modern, Classic, Technical, Inspired, Creative, Header Band, Straightforward, and Sidebar Left/Right. Switch anytime without losing data.

2 Drag & Drop Section Reordering

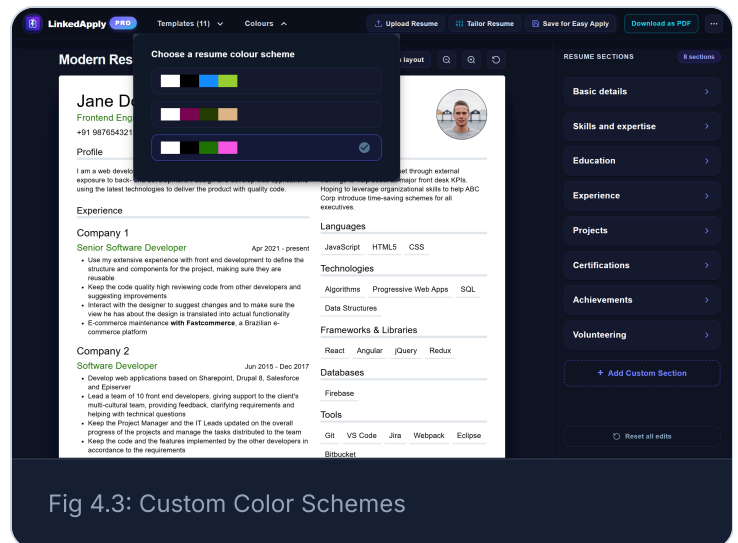

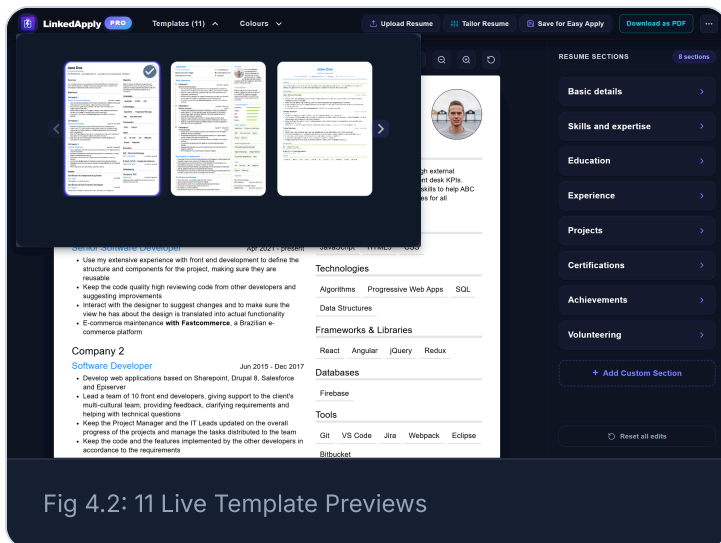

Rearrange Basic Details, Skills, Experience, Education, Projects, Certifications, Achievements, and Volunteering. Add custom sections with a single click.

3 Live Color Themes

Select tailored palette combinations (Indigo, Emerald, Navy, Crimson) that match your target industry's conventions.

4 One-Click PDF Export & Easy Apply Sync

Download a print-ready vector PDF instantly, or click **Save for Easy Apply** to automatically set your tailored resume as the default file uploaded during automation.

SECTION 05

🌟 Job-Specific AI Resume Tailoring

A generic resume converts poorly. Recruiter ATS algorithms score your resume against the exact keywords and skills in the job posting. LinkedApply Pro's AI Tailoring engine analyzes any job description and rewrites your resume sections to achieve high ATS match scores.

Tailor Your Resume for Every Job Description

Keyword gap analysis • Real-time ATS match scoring • One-click auto tailoring

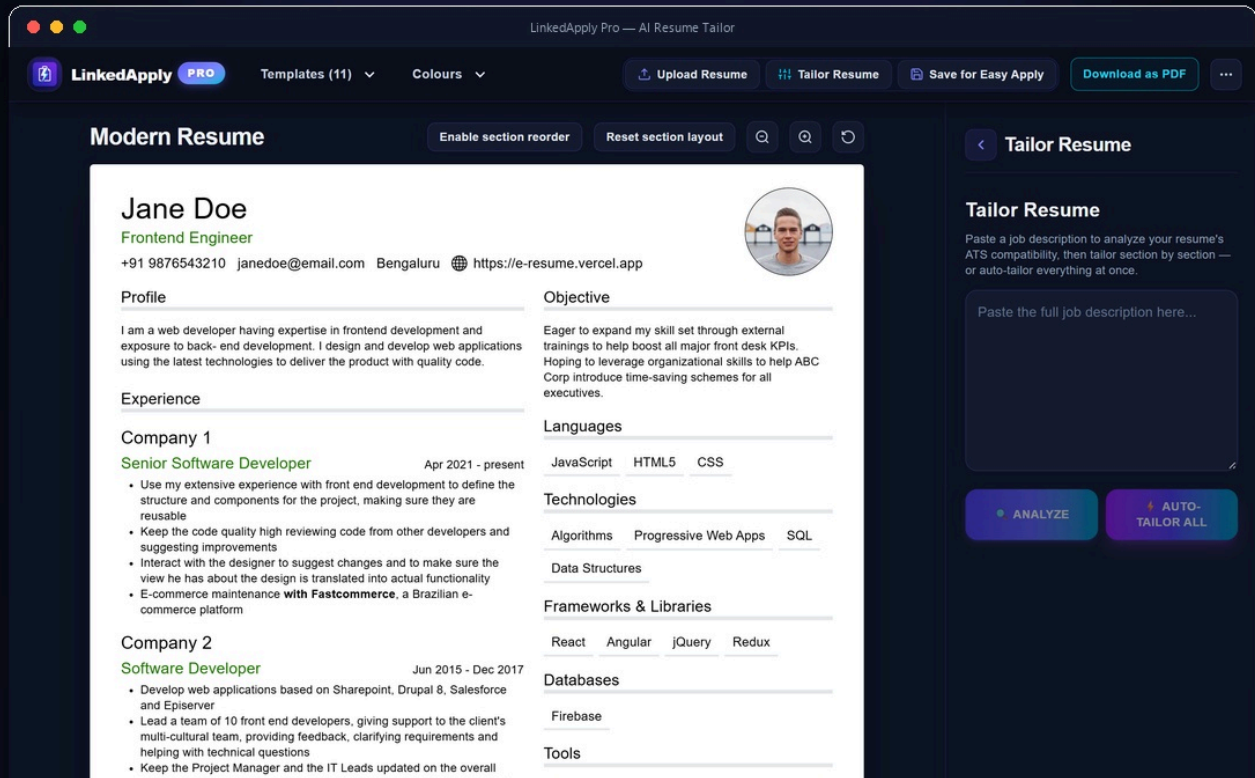

Fig 5.1: The AI Tailor drawer performing job description gap analysis

How to Tailor in 3 Steps:

1 Open the Tailor Drawer

In the Resume Builder, click ✨ **Tailor Resume** in the top navigation bar to slide out the tailoring workbench.

2 Paste the Target Job Description

Copy the job requirements from LinkedIn or company careers site into the textarea and click 🔍 **Analyze**.

3 Review Gap Analysis & Auto-Tailor

The engine runs an offline smart-matcher to identify matched vs missing skills, computes an ATS score, and suggests rewritten bullet points using Google's XYZ formula (*"Accomplished [X] as measured by [Y] by doing [Z]"*). Click ⚡ **Auto-Tailor All** to apply the enhancements.

SECTION 06

⚡ LinkedIn Auto-Apply Automation

Once your profile and resume are set up, you can start applying to dozens of relevant jobs with a single click while maintaining safe browsing habits.

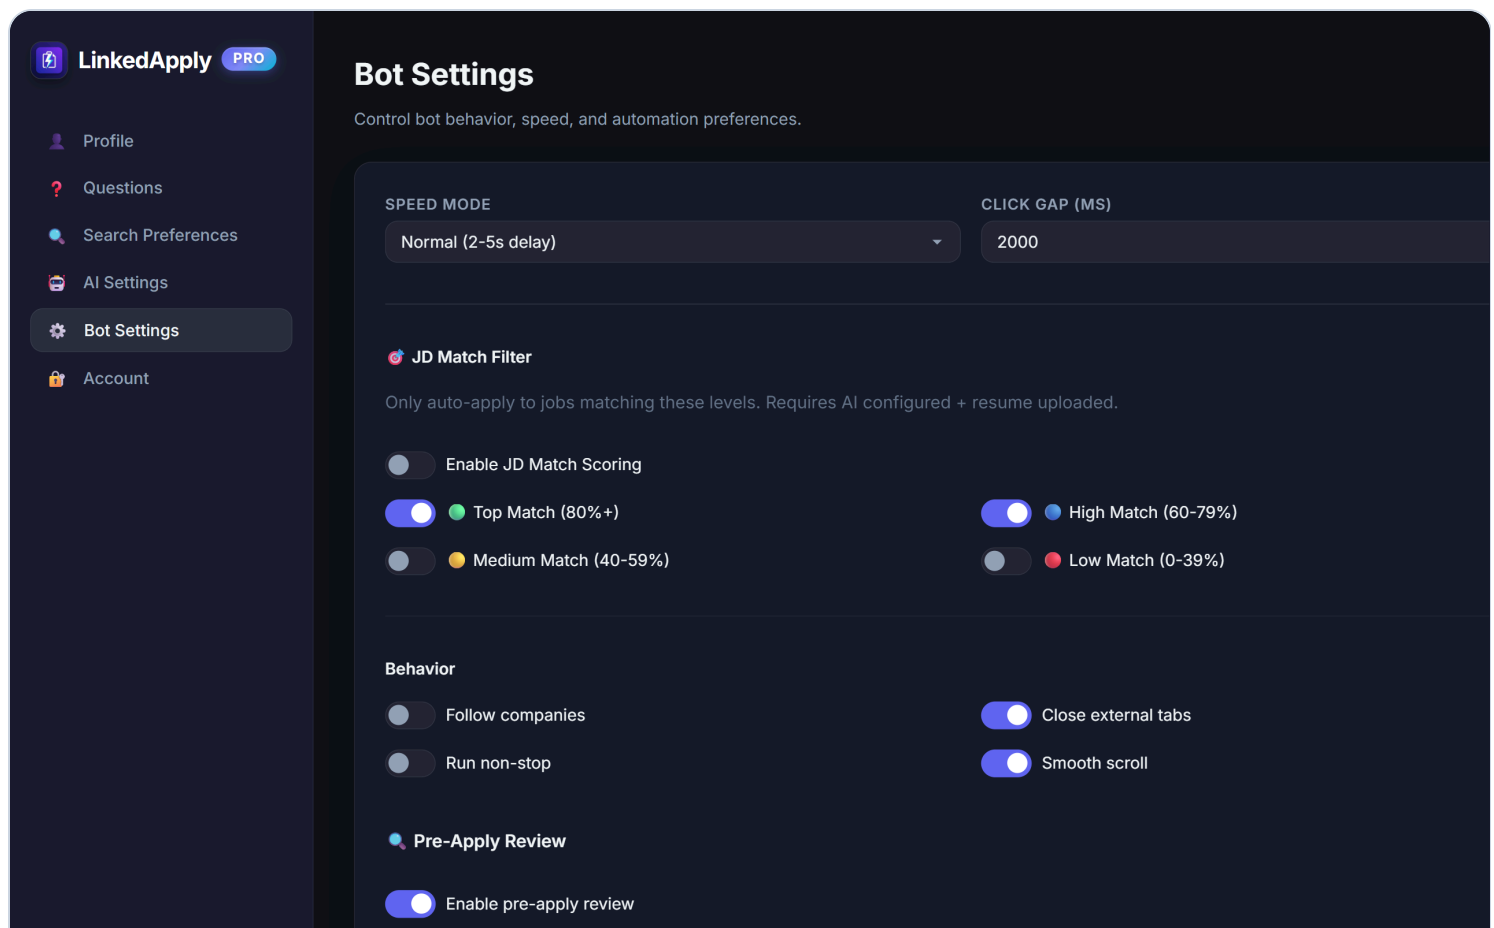

Fig 6.1: Bot Automation Settings (Speed mode, click gap, and match score filters)

Automation Modes & Pacing

Setting	Recommended Value	Purpose
Speed Mode	Normal (2-5s delay)	Emulates natural human reading and clicking intervals to protect your LinkedIn account.
Click Gap	2000 ms (2.0s)	Time delay between successive form interactions.
JD Match Filter	Top Match (80%+) & High (60-79%)	Only applies to jobs where your qualifications strongly match the requirements.
Pre-Apply Review	Enabled (Optional)	Pauses before clicking final submit, allowing you to review all filled fields.

How to Run an Automation Session:

1. Navigate to [linkedin.com/jobs](https://www.linkedin.com/jobs) in Chrome.
2. Enter your job title and preferred location (e.g. *"Frontend Engineer"* in *"Remote"*).
3. Ensure the **Easy Apply** filter toggle is active on LinkedIn.
4. Open the LinkedApply Pro popup or sidepanel and click ► **Start**.
5. The bot will scroll through listings, verify match criteria, fill application questions, upload your resume, and submit.

SECTION 07

Sidepanel Dashboard & Application Tracking

Monitor your job search pipeline in real-time through the sidepanel dashboard that docks right beside LinkedIn.

Track Applications & Set Daily Goals

Live session analytics • Auto-apply progress • Time saved counter & Kanban pipeline

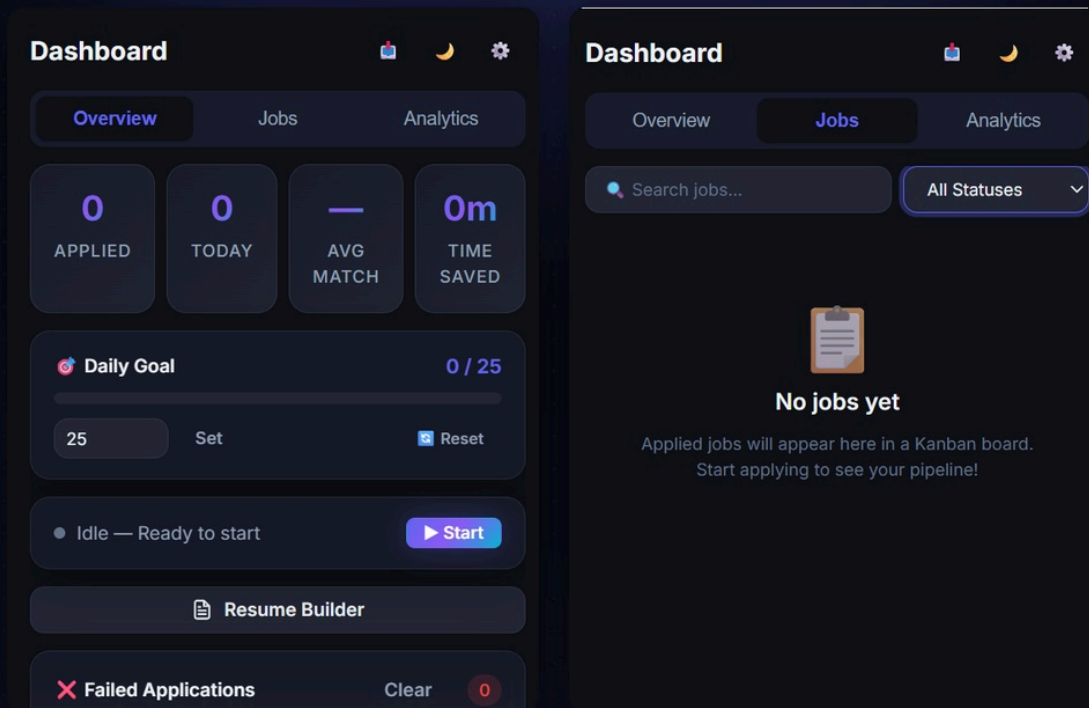

Fig 7.1: Real-time sidepanel dashboard (Overview tab on left; Jobs pipeline tab on right)

Dashboard Features

Live Session Metrics

Track applications sent today, total applications, average match percentage, and estimated hours saved.

Daily Goal Tracker

Set a daily application target (e.g. 25/day). The visual progress bar tracks completion and stops when your goal is met.

Kanban Job Pipeline

View all applied jobs categorized by status: Applied, Interviewing, Offer, or Archived with direct links to job posts.

Failed Application Inspector

Shows any application that could not be completed (e.g. external complex redirects) with 1-click logs to finish manually.

LinkedIn Account Safety & Best Practices

Automating job searches requires discipline to keep your LinkedIn account in good standing. Follow these golden rules for risk-free operation:

1 Respect Safe Daily Limits

- **New accounts (< 6 months old):** 15–25 applications per day.
- **Established accounts (> 1 year old):** 40–60 applications per day.
- Avoid setting daily goals higher than 75 to keep activity within typical human thresholds.

2 Keep Human Pacing Active

Always use **Normal Speed Mode** with 2–5 second delays. Never reduce click gaps to zero.

3 Don't Run Multiple Bots Simultaneously

Do not run other automation tools or scrapers on LinkedIn at the same time. Let LinkedApply Pro handle your sessions smoothly.

SECTION 09

FAQ & Troubleshooting

Q: Is LinkedApply Pro really 100% free?

Yes. The extension itself is completely free with no subscriptions. When using Google Gemini for AI question answering, Google's free tier provides thousands of free requests daily at zero cost.

Q: Are my LinkedIn passwords or personal data collected?

Never. LinkedApply Pro runs 100% client-side inside your browser sandbox. It never touches your account password, and your resumes and settings are saved exclusively in your browser's local storage.

Q: What if a job requires an external redirect instead of Easy Apply?

LinkedApply Pro specifically handles LinkedIn Easy Apply modals. When a job redirects to Workday, Greenhouse, or external career portals, the bot flags it and gracefully skips or logs it under Failed/External so you can apply manually if desired.

Q: How do I back up or transfer my resumes and settings?

Go to Settings → **Account**. Click **Export Data** to download a complete JSON backup of all your saved resumes, profile information, and application history. You can restore it on any computer anytime.
